PROFESSIONAL SUMMARY

Full-Stack Developer and Security Engineer with 3+ years of experience building secure, scalable web applications. Skilled in React/Vite frontends and Python/Flask or Node.js backend systems, with strong experience in API development, cloud deployment, and secure authentication architectures. Delivered 10 production-grade applications under NDA, improving system performance and implementing security-first engineering practices aligned with OWASP standards. Currently pursuing a Bachelor of Information Technology (Cybersecurity) at KCA University (Expected 2027).

TECHNICAL SKILLS

Languages: Python • JavaScript • SQL • Java • HTML5 • CSS3

Frontend Development: React • Vite • CSS • Framer Motion

Backend & APIs: Flask • Python

Databases: PostgreSQL • Redis • SQLAlchemy

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS) • DigitalOcean • Vercel • Linux / Ubuntu

Security: OWASP Top 10 • Penetration Testing • Burp Suite • JWT Authentication • OAuth 2.0 • MFA • API Security • Threat Modelling • DevSecOps

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer & Security Engineer

Remote / Project-Based | 2023 – Present

- Designed and delivered 13 secure web applications for clients across e-commerce, analytics dashboards, CMS platforms, and security tooling.
- Improved API performance and page load speeds by over 40% through backend optimization and caching strategies.
- Implemented secure authentication systems including JWT, OAuth 2.0, MFA, and role-based access control.
- Integrated Stripe payment systems and real-time communication features using WebSockets and Socket.io.
- Conducted OWASP-aligned vulnerability assessments and produced remediation reports for web applications.
- Containerized services using Docker and deployed automated pipelines with GitHub Actions CI/CD across AWS, DigitalOcean, and Vercel.

SELECTED PROJECT EXPERIENCE

Secure E-Commerce Platform

Developed a full-stack online store with Stripe payment integration, secure checkout workflows, and an admin dashboard for product and order management.

Real-Time Messaging Application

Built a WebSocket-powered messaging platform with live notifications, message persistence, and file sharing using Node.js and Socket.io.

Authentication & Security Microservice

Designed a centralized authentication service supporting JWT authentication, OAuth 2.0, MFA, and role-based access control.

Analytics Dashboard

Created a real-time data visualization dashboard for tracking KPIs with exportable reports and user activity insights.

Security Audit Automation Tool

Developed a Python-based tool for automated vulnerability scanning and reporting aligned with OWASP security practices.

(Client project details limited due to NDA agreements.)

EDUCATION

Bachelor of Information Technology (Cybersecurity & Software Engineering)

KCA University — Nairobi, Kenya

Expected Graduation: 2026

Relevant Coursework: Network Security • Cryptography • Ethical Hacking • Software Design Patterns • Database Systems

Software Development Certification (Full-Stack Engineering)

Moringa School — Nairobi, Kenya

Completed: 2023

Intensive full-stack program covering React, Flask, PostgreSQL, REST APIs, and production-ready development practices

Cybersecurity Training & CTF Participation

AfricaHackOn Foundation

- Participated in hands-on Capture-The-Flag (CTF) security challenges
- Practiced web penetration testing using Burp Suite, Nmap, and Kali Linux
- Completed labs in OSINT, cryptography, and digital forensics

CERTIFICATIONS

- AI Certificate – Artificial Intelligence Concepts & Applications (2024)
- Software Development Certificate – Moringa School (2023)

LANGUAGES

- English — Professional
- Swahili — Native
- Kikuyu — Native
