PROFESSIONAL SUMMARY

Cybersecurity Engineer with a strong background in software engineering, secure application development, web and API security testing, cloud security assessments, threat hunting, and vulnerability management. Experienced in building and securing production systems while applying both offensive and defensive security practices.

TECHNICAL SKILLS

Security: OWASP Top 10, Web Application Security Testing, API Security Testing, Threat Hunting, Vulnerability Assessment, Incident Response, OSINT
Tools: Burp Suite, Nmap, Wireshark, Kali Linux, Git, Docker
Cloud & DevSecOps: AWS (IAM, EC2, S3, Lambda, RDS), GitHub Actions, CI/CD
Programming: Python, JavaScript, SQL, Java
Frameworks: React, Flask, Node.js

PROFESSIONAL EXPERIENCE

Cybersecurity & Full-Stack Consultant (2023–Present)

- Delivered 13 secure web applications across e-commerce, analytics, CMS, and security-focused environments.
- Implemented JWT, OAuth2, MFA, and RBAC security controls.
- Conducted OWASP-aligned vulnerability assessments and remediation reviews.
- Built CI/CD pipelines and deployed solutions across AWS, DigitalOcean, and Vercel.

Odoo ERP Developer (2022–2023)

- Developed custom Odoo modules and third-party integrations.
- Automated business workflows and deployed ERP solutions for SMEs.

CYBERSECURITY EXPERIENCE

Threat Hunting Volunteer – OmniRoute Web

- Investigated logs, network traffic, and indicators of compromise.

Security Volunteer – HackerSavannah

- Participated in penetration testing workshops and security research discussions.

AWS IAM Security Labs (flaws.cloud)

- Practiced IAM privilege escalation, cloud enumeration, and remediation techniques.

AfricaHackOn CTF & Security Labs

- Completed challenges in web exploitation, privilege escalation, OSINT, cryptography, and digital forensics.

PROJECTS

Secure E-Commerce Platform – Stripe integration, RBAC controls, secure authentication, and OWASP-aligned validation.

Authentication & Security Microservice – JWT, OAuth2, MFA, and RBAC support.

Security Audit Automation Tool – Python-based vulnerability scanning and reporting platform.

Real-Time Messaging Application – Secure WebSocket-powered communication platform.

CERTIFICATIONS

- Cybersecurity Certificate — AfricaHackOn Foundation (2026)
- Artificial Intelligence: Concepts & Applications (2024)
- Software Development Certificate — Moringa School (2024)

EDUCATION

BSc Information Technology (Cybersecurity) — KCA University (Expected 2026)
Relevant Coursework: Network Security, Cryptography, Ethical Hacking, Database Systems.

Software Development Certification — Moringa School (2024)
